Seki-Han Floor

Designed by Tobia Scarpa, 2025

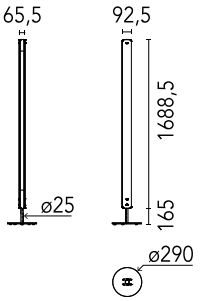

LED retrofit - 22W - 2700K - CRI> 90

Floor lamp emitting direct and indirect light with symmetrical and asymmetrical distribution. Features two vertical ash wood blades joined by chrome-plated metal fittings. Blades rotate around a central tubular light source to allow variable light emission. Raw black iron base separated from the vertical blades by a collar. Custom-developed dimmable linear LED light source. The lamp can also be fitted with standard T8 LED tubes.

Designed by Tobia Scarpa in 1963 and reissued in 2025, Seki-Han is testament to his mastery of design and woodworking expertise. The intricate construction draws on naval techniques to shape two wooden blades that now rotate around the light source. Even when almost completely closed, a sliver of light remains visible, creating a highly poetic effect. Named after a traditional Japanese rice dish served on special occasions, Seki-Han is a living presence where the immateriality of light meets the tactility of wood.
